

LEROTTO

coming soon page

HELLO WORLD!

In this guide I'll go through all the steps needed to set up this site, I'll explain everything in a basic way so everyone can understand, I'd like to apologize in advance to whom already knew these things.

Requirements

In order to get this site to work you need a hosting. You can get one for fairly cheap, just have a look around, you won't need a lot of space since there aren't heavy files to be uploaded. I'd say that 5GB are more than enough.

If you plan on receiving loads of visitors I'd suggest you to look for a hosting Provider that offers UNLIMITED or UNMETERED BANDWIDTH.

You'll need also an editor to edit and modify the code, if you are on a Windows machine I'd suggest Notepad++ (free <https://notepad-plus-plus.org/>) else if you're on a Linux machine I'd suggest Gedit (free, just type in the terminal: "sudo apt-get install gedit").

EDIT CONTENT

Once you downloaded the folder from themeforest, unzip it, in this guide I'll assume to unzip it in a "leROTTO" folder placed in desktop.

Once opened you'll see 4 folders named: php, css, js, images. And many .html files.

Choose the best one for you, the name of each page is pretty self-explanatory.

Let's assume you want to create a site like this one below:

CONTACT ME

Please fill in the form

Name

Email

Message

CONTACT ME

First of all I will rename the file: leROTTO-ContactmeCountdown.html to index.html, then I'll open index.html with the editor.

LANGUAGE

Insert the ISO language code of the language you are going to use on your site

```
<!-- Insert after lang= the language used on your site,  
Example no. 1: if my site has english content I'll write <html lang="en">  
Example no. 2: if my site has italian content I'll write <html lang="it">  
(If your language isn't one of the two above, look up ISO Language Codes on the Internet)-->  
<html lang="en">
```

SITE DESCRIPTION

Insert the Description, just few words

```
<!-- Enter a small description of your page, around 10-15 words (or anyways no more than 100 characters)
Example no. 1: Developer personal page <meta name="description" content="Jhon Smith personal web page">
Example no. 2: Startup landing page <meta name="description" content="Example lcc world's leader startup in tech supply">
-->
<meta name="description" content="">
```

AUTHOR

Insert your Name, or your company Name

```
<!-- Enter the name of the author
Example no. 1: Personal <meta name="author" content="Jhon Smith">
Example no. 2: Entrepriase <meta name="author" content="Example lcc">
-->
<meta name="author" content="">
```

FAVICON

Remember to put your Favicon.ico in the folder images (favicon.ico is the icon that gets displayed in the address bar of every browser).

If you do not have one a blank square will be displayed in the address bar

TITLE

Insert the Title of your site (this also gets displayed in the address bar of every browser)

```
<!-- Enter the title of your site (shows in the tab of the browser)
Example no. 1: Restaurant <title>Bolognese restaurant</title>
Example no. 2: Hotel <title>hotel Example 5 stars</title>
-->
<title>leROTTO - Coming Soon page</title>
```

YOUTUBE VIDEO SETTINGS

Here you can manage the YouTube video

```
<!-- Put here the link to your youtube video -->
<a id="bgndVideo" class="player" data-property="{videoURL:'https://www.youtube.com/watch?v=gbrkMDkV8gc',containment:'body',autoplay:true, mute:true, startAt:0, opacity:1}"></a>
```

Insert after videoURL: the URL to your YouTube video, for example my video URL is

<https://youtube.com/12345>, I'll write videoURL: <https://youtube.com/12345>.

If you want the audio of the video to be played on your site change mute:true to mute:false.

If for same reason you want to start the video at a certain second/minute (could be useful to jump boring intro) just modify startAt:0 with startAt: and the number of seconds you want to jump from the start.

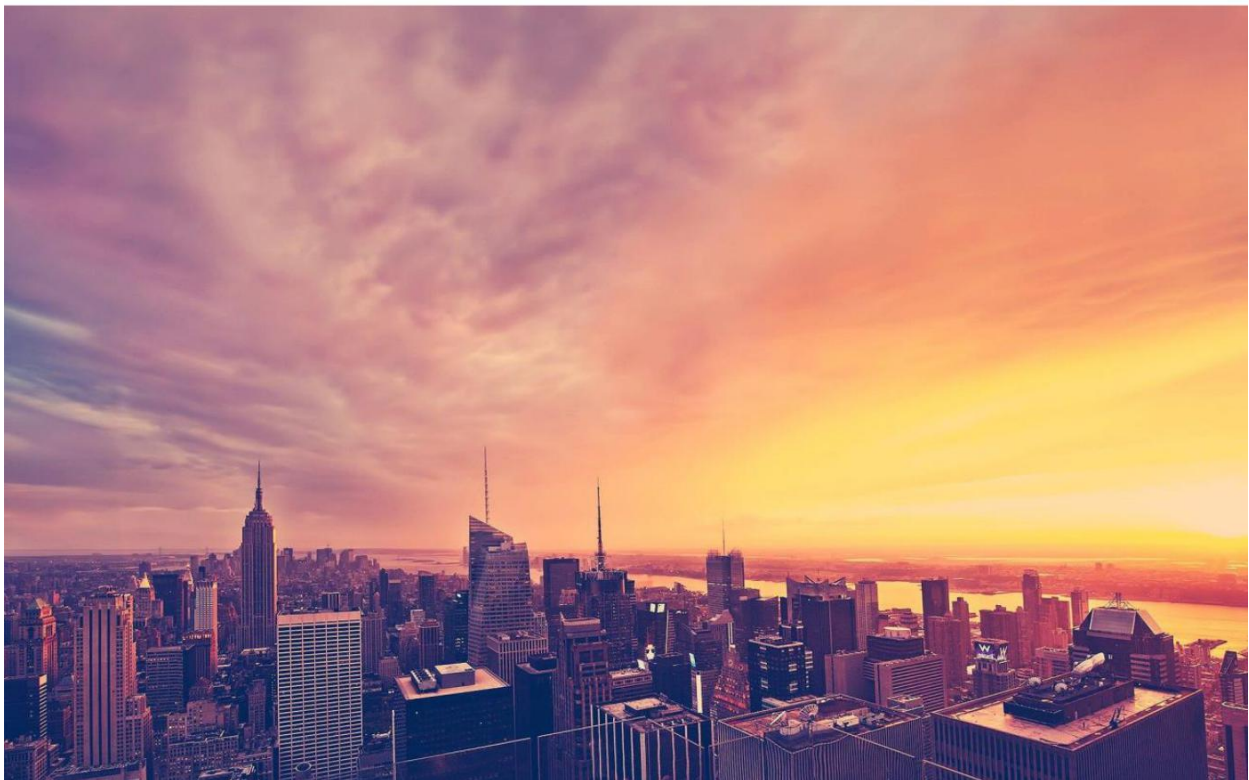

```
data-property="{videoURL:'https://www.youtube.com/watch?v=gbrkMDkHRgc',containment:'body',autoPlay:true,mute:true,startAt:0,opacity:1}":
```

LOADING IMAGE & OVERLAY IMAGE

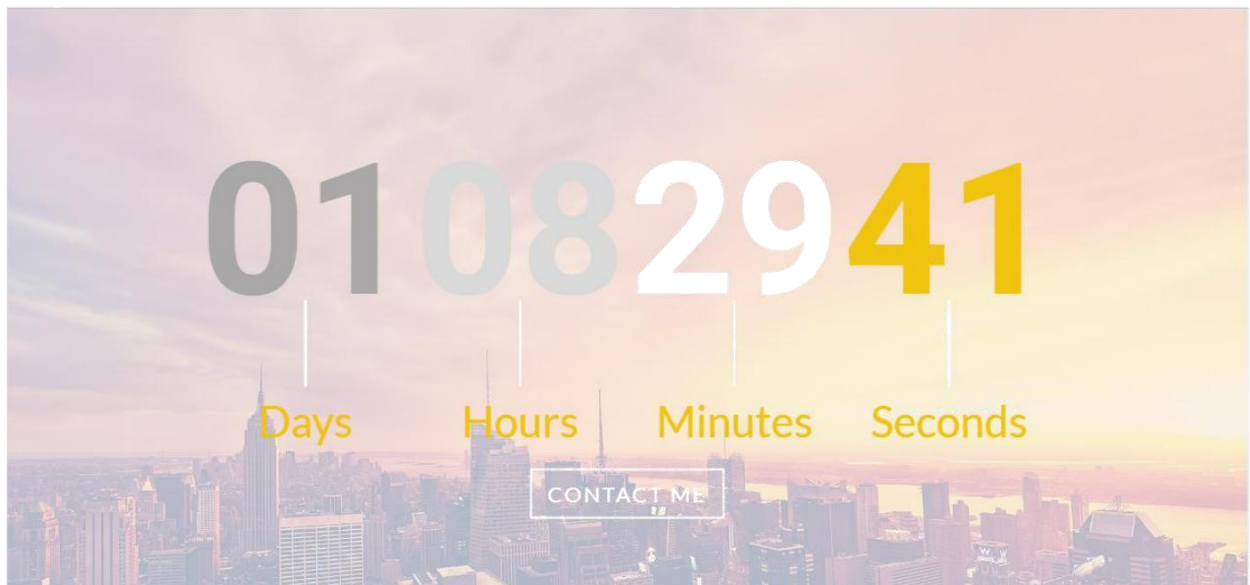

Now, if you want a picture that shows before the video loads or you want a picture in between the video and the text, keep the following line, otherwise delete it (we will see afterwards how to make the default image show only in the loading or going in between video and text)

```
<!-- Image layer between the pattern and the video or Image before loading (delete the next line if you don't want to show an  
<div class="videobkg-default-image" id="defaultimage"></div>
```

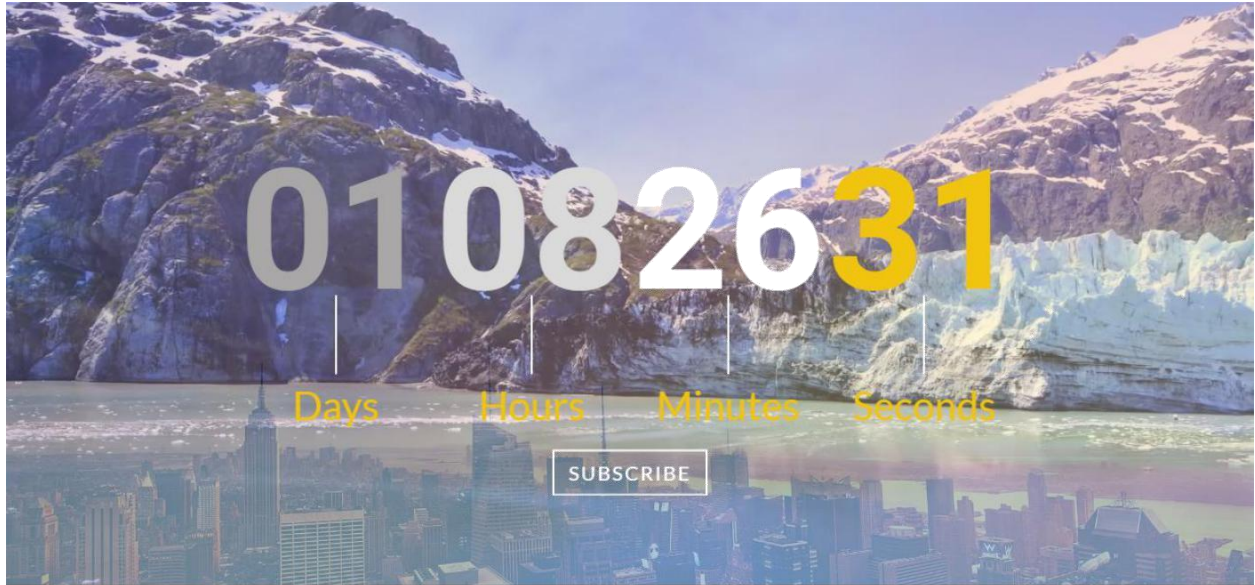

Default image is named “defaultimage.jpg” and it’s located in the image folder:

On site effect keeping the line “<div class="videobkg-default-image" id="defaultimage"></div>” (loading, no video):

On site effect keeping the line “<div class="videobkg-default-image" id="defaultimage"></div>” (between video and text):

If you like this transparency effect just put the picture you want in the images folder and name it defaultimage.jpg else delete the line

PATTERN

This line activates the grid

```
<div class="pattern"></div>
```

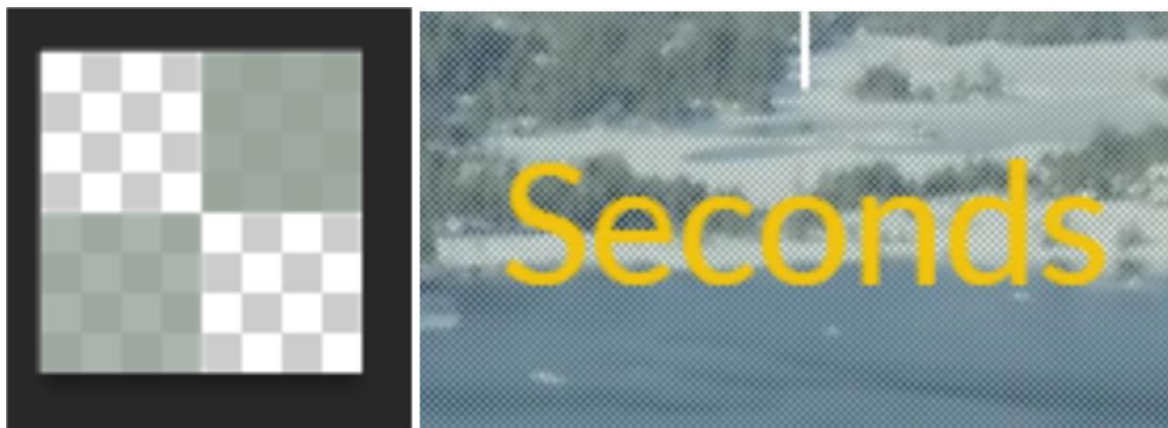

If you delete this line the video will show clear.

These line triggers the grid, you can choose the pattern you like. Just go in the images folder and choose the one you prefer:

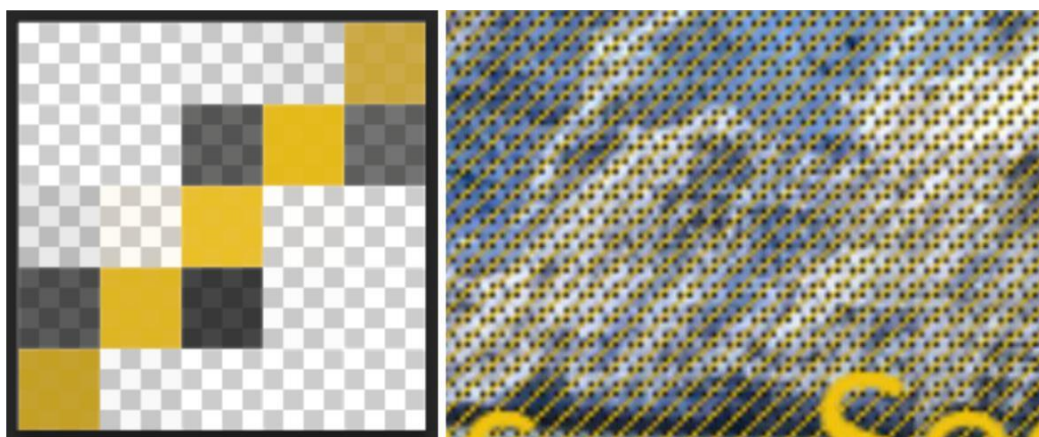

DEFAULT PATTERN

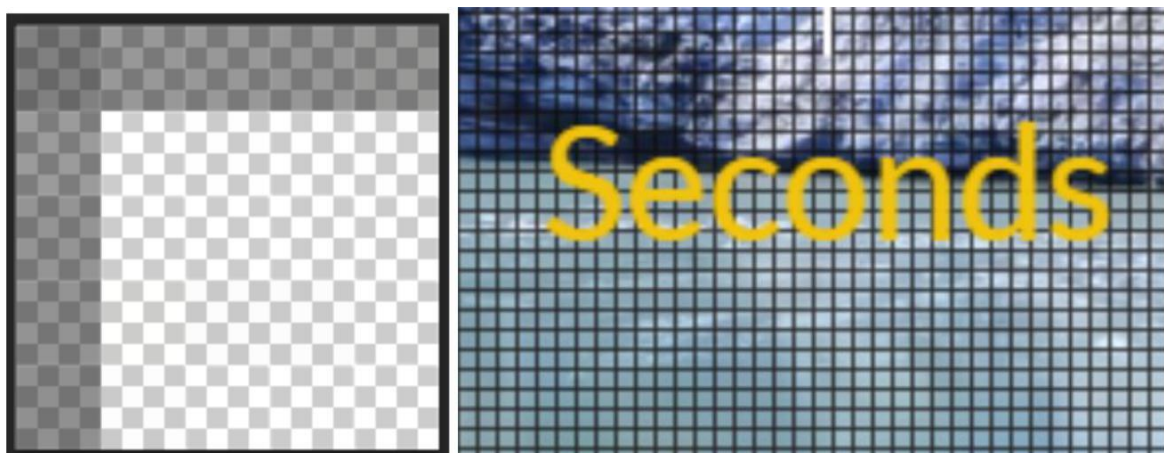

PATTERN1

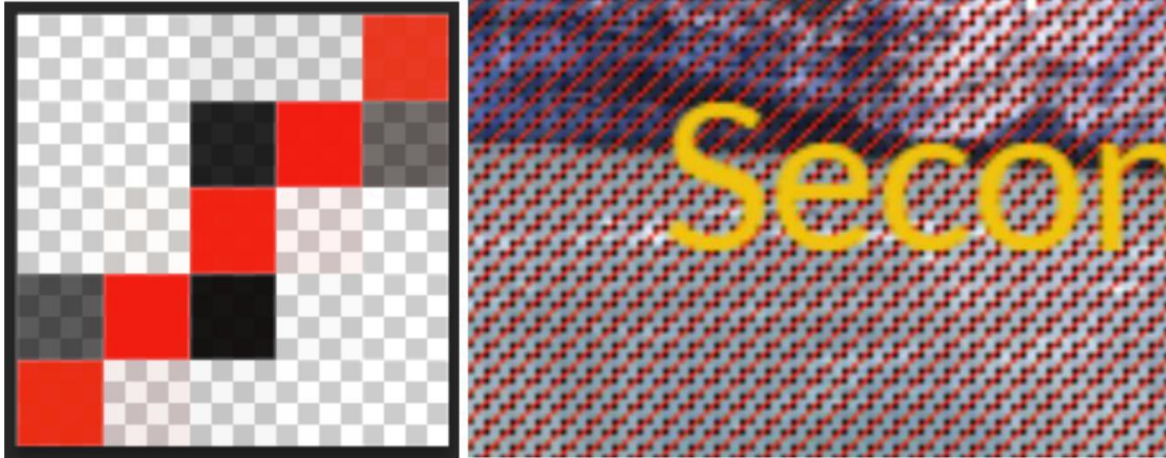

PATTERN2

PATTERN3

PATTERN4

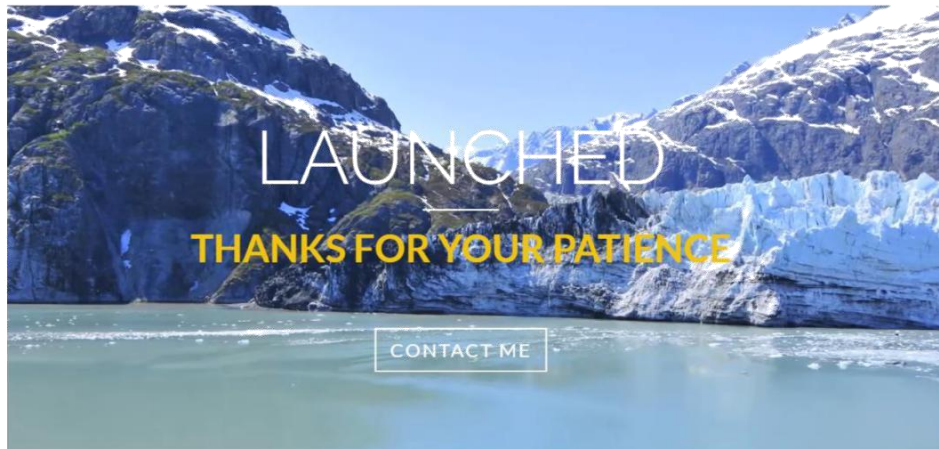

NO PATTERN

TEXT TO SHOW WHEN THE DATE IS ELAPSED

```
var todaydate=new Date(),datecount=new Date(datecount),diff= datecount - todaydate;
if(diff<0){
    //Text you want to see after the date choosen is elapsed(BIG TITLE)
    gid("title").innerHTML = "Launched";
    gid("lineo").style.display = "block";
    //Text you want to see after the date choosen is elapsed(SUB TITLE)
    gid("subtitle").innerHTML = "THANKS FOR YOUR PATIENCE";
    gid("lineo").style.display = "none";
}
```

This code will show the following text when the date is elapsed :

Change `“gid(“title”).innerHTML = “Launched”;”` to modify the first line.

Change `“gid(“subtitle”).innerHTML = “THANKS FOR YOUR PATIENCE”;”` to modify the second line

SET THE DATE

```
counter("oct,29,2016,10:10:00");
```

Set the date you want the countdown to end.

Please use this format: month,day,year,hours:minutes:seconds

In the month field please use the following abbreviations:

jan=January

feb=February

mar=March

apr=April

may=May

jun=June

jul=July

aug=August

sep=September

oct=October

nov=November

dec=December

SET THE DEFAULT IMAGE AS LOADING ONLY

If you want to keep the defaultimage.jpg in between the video and the text just delete the following code.

```
<script>
  setTimeout(function (){
    document.getElementById("defaultimage").style.display = "none";
    document.getElementById("defaultimage").style.opacity = 0;
  }, 2000);
</script>
<!--Getting rid of the defaultimage.jpg END-->
```

Instead if you want the defaultimage.jpg to appear only before the video is loading keep the code above.

CHANGE THE TEXT OF THE BUTTON CONTACT ME

If you want to change the text of this button:

Just change the line below with the text you like

```
<a href="#contactme" class="videobkg-btn">Contact ME</a>
```

Example:

```
<a href="#contactme" class="videobkg-btn"> Button text here</h2>
```

MODIFY CONTACT ME FORM (TITLE, TEXT)

CONTACT ME

Please fill in the form

Name

To change the text of the heading ("CONTACT ME") in the contact me section, edit the line below:

```
<h2 class="contactme-section-title">Contact me</h2>
```

To change the sub-title ("Please fill in the form"), edit the line below:

```
<p>Please fill in the form</p>
```

SOCIAL SECTION

```
<li><a href="https://www.facebook.com/" target="_blank"><i class="fa fa-facebook fa-3x"></i></a></li>
<li><a href="https://twitter.com/" target="_blank"><i class="fa fa-twitter fa-3x"></i></a></li>
<li><a href="https://plus.google.com/" target="_blank"><i class="fa fa-google-plus fa-3x"></i></a></li>
<li><a href="https://www.behance.net/" target="_blank"><i class="fa fa-behance fa-3x"></i></a></li>
<li><a href="https://dribbble.com/" target="_blank"><i class="fa fa-dribbble fa-3x"></i></a></li>
<li><a href="https://github.com/" target="_blank"><i class="fa fa-github fa-3x"></i></a></li>
<li><a href="https://www.linkedin.com/" target="_blank"><i class="fa fa-linkedin fa-3x"></i></a></li>
<li><a href="https://paypal.com/" target="_blank"><i class="fa fa-paypal fa-3x"></i></a></li>
<li><a href="https://pinterest.com/" target="_blank"><i class="fa fa-pinterest fa-3x"></i></a></li>
<li><a href="https://soundcloud.com/" target="_blank"><i class="fa fa-soundcloud fa-3x"></i></a></li>
<li><a href="https://slack.com/" target="_blank"><i class="fa fa-slack fa-3x"></i></a></li>
<li><a href="https://www.twitch.tv/" target="_blank"><i class="fa fa-twitch fa-3x"></i></a></li>
<li><a href="https://vimeo.com/" target="_blank"><i class="fa fa-vimeo fa-3x"></i></a></li>
<li><a href="https://www.youtube.com/" target="_blank"><i class="fa fa-youtube fa-3x"></i></a></li>
<li><a href="https://vine.co/" target="_blank"><i class="fa fa-vine fa-3x"></i></a></li>
<li><a href="https://www.whatsapp.com/" target="_blank"><i class="fa fa-whatsapp fa-3x"></i></a></li>
```

Keep just the lines you need.

Example:

I only have Facebook so I'll keep just this line:

```
<li><a href="https://www.facebook.com/" target="_blank"><i class="fa fa-facebook fa-3x"></i></a></li>
```

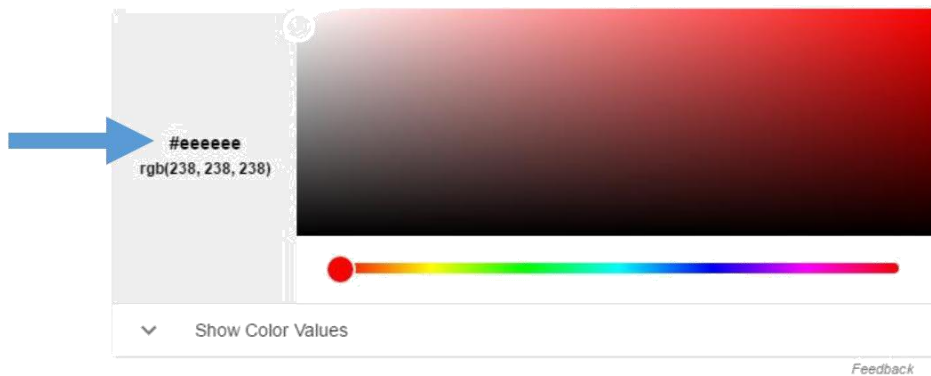

And I'll edit it with my facebook url, like this:

```
<li><a href="http://MyFacebookPageURL.com" target="_blank"><i class="fa fa-facebook fa-3x"></i></a></li>
```

EDIT COLORS

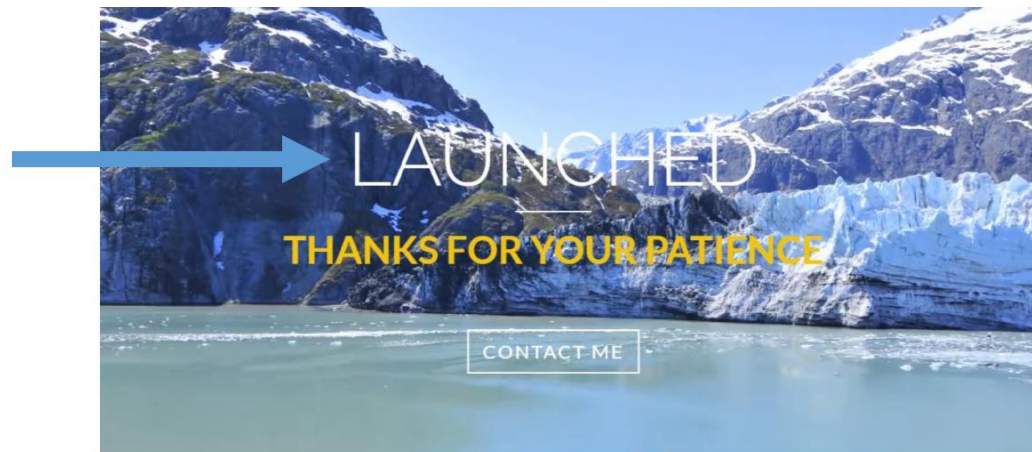

To edit the colors of the site you should open the file `style.css` in the editor, `style.css` is located in the folder named `css`.

To set the colors I'd suggest to use the Google tool that you can access with every browser just by typing “#eeeeee” in the search bar.

Select the color you want and copy the value with the hashtag on the left.

CHANGING COLOR OF THE TITLE THAT APPEARS WHEN
THE DATE SET ON THE COUNTDOWN IS ELAPSED

To change the color of the title just search for this code:

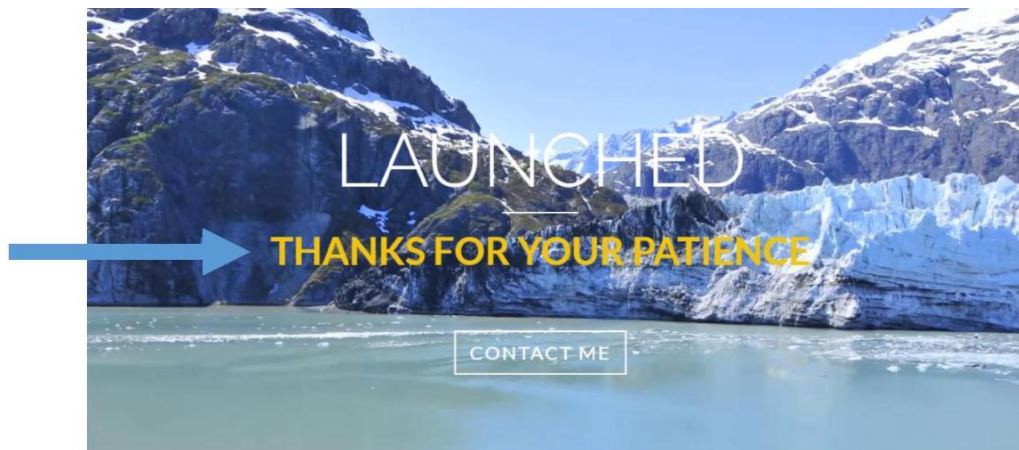

```
.videobkg-title {
  font-family:'Raleway',sans-serif;
  font-size:78px;
  color:■ #fff;
  font-weight:300;
  text-transform:uppercase;
  text-align:center;
  margin-bottom:22px;
  padding-top:20px;
  display:inline-block;
  background-attachment:scroll;
  background-repeat:repeat-x;
  background-position:top center
}
```

Now change “color: #fff;” with the color you want.

Example:

I want the title to be red, the code for red is #ff0000, so I'll write “color: #ff0000”

CHANGING COLOR OF THE SUB-TITLE THAT APPEARS WHEN THE DATE SET ON THE COUNTDOWN IS ELAPSED

To change the color of the sub-title just search for this code:

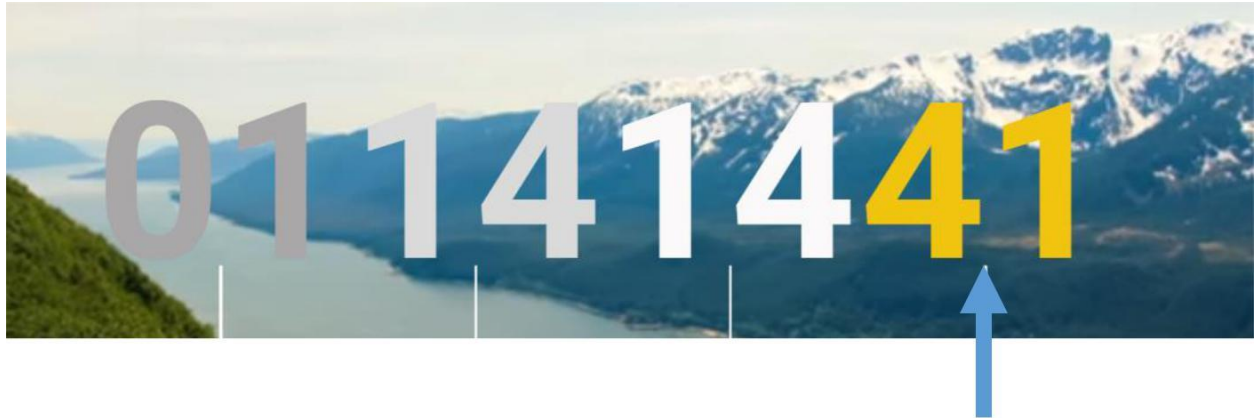

```
#colorify {
  color:■ #f1c40f;
  font-family:'Lato',sans-serif;
  font-size:40px
}
```

Now change “color: #f1c40f;” with the color you want.

Example:

I want the subtitle to be red, the code for red is #ff0000, so I'll write “color: #ff0000”

CHANGING COLOR OF SECONDS IN THE COUNTDOWN

To change the color of the digits of seconds, just search for this code:

```
#seconds {  
  color: ■ #f1c40f  
}
```

Now change “color: #f1c40f;” with the color you want.

Example:

I want the seconds to be red, the code for red is #ff0000, so I'll write “color: #ff0000”

CHANGING COLOR OF MINUTES IN THE COUNTDOWN

To change the color of the digits of minutes, just search for this code:

```
#minutes {  
  color: ■ #fbfafa  
}
```

Now change “color: #fbfafa;” with the color you want.

Example:

I want the seconds to be red, the code for red is #ff0000, so I'll write “color: #ff0000”

CHANGING COLOR OF HOURS IN THE COUNTDOWN

To change the color of the digits of hours, just search for this code:

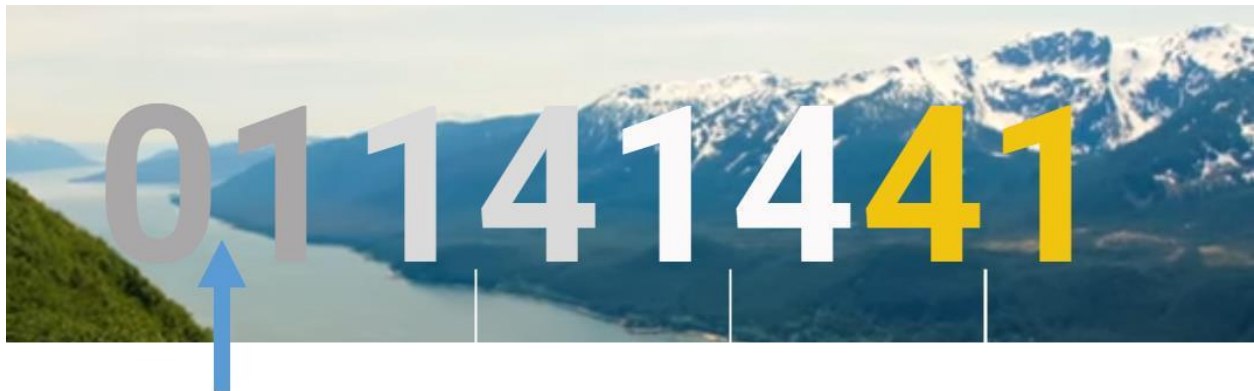

```
#hours {  
  color: ■ #dadada  
}
```

Now change “color: #dadada;” with the color you want.

Example:

I want the seconds to be red, the code for red is #ff0000, so I'll write “color: #ff0000”

CHANGING COLOR OF DAYS IN THE COUNTDOWN

To change the color of the digits of days, just search for this code:

```
#days {  
  color: #a9a7a7  
}
```

Now change “color: #a9a7a7;” with the color you want.

Example:

I want the seconds to be red, the code for red is #ff0000, so I’ll write “color: #ff0000”

CHANGING COLOR OF THE WORDS “DAYS HOURS MINUTES SECONDS” IN THE COUNTDOWN

To change the color of the words, just search for this code:

```
#labelse {  
  color: #f1c40f;  
  font-family: 'Lato', sans-serif;  
  font-size: 40px  
}
```

Now change “color: #f1c40f;” with the color you want.

Example:

I want the seconds to be red, the code for red is #ff0000, so I’ll write “color: #ff0000”

EDIT SCRIPTS

In this section we will edit the files: contactme.php and subscribe.php (both located in the php folder)

SET UP CONTACTME.PHP

This script sends to your email address the messages submitted via contact form.

Open contactme.php with the editor.

INSERT YOUR EMAIL

```
// Enter the email address where you want to receive the emails written with the contact form
$email_to = "your.email@address.com";
```

(OPTIONAL) INSERT THE SUBJECT OF THE EMAIL

```
$email_subject = "Message from your landing page";
```

SET UP SUBSCRIBE.PHP

This script sends to your email address the email addresses submitted via the subscribe form.

Open `subscribe.php` with the editor.

INSERT YOUR EMAIL

```
$to = "your.email@address.com";
```

(OPTIONAL) INSERT THE SENDER OF THE EMAIL

```
//Example: I want the sender of the email to be no-reply@yoursite.com  
$from = "no-reply@yoursite.com";
```

This is the email address you'll receive the email addresses submitted via the subscribe form from

(OPTIONAL) INSERT THE SUBJECT OF THE EMAIL

```
$subject = "New subscription";  
$headers = "MIME-Version: 1.0" . "\r\n" .
```
